Ganeca Services: Dedicated Engineering Support for PROPER

Project Overview

Ganeca Environmental Services provides dedicated engineering support to PT Vale Indonesia Tbk. Site Sorowako in supporting community development and sustainability programs. The support covers program development based on community needs, social issue analysis, stakeholder engagement, and cross-functional coordination. Ganeca also assists in managing PROPER documentation and evidence, as well as activities related to Sustainability and ESG.

The Challenge

Implementing community development programs requires strong coordination among the company, communities, government institutions, NGOs, and other stakeholders. Programs need to be aligned with community needs, corporate sustainability objectives, and PROPER requirements. In addition, managing supporting documents and evidence requires structured coordination and information gathering from multiple parties.

Our Solution

Ganeca provides a dedicated engineer to support the implementation of community development and sustainability programs in close coordination with the company's internal teams. The support includes social issue analysis, program development, stakeholder engagement, and coordination of activities involving various stakeholders. Ganeca also assists in preparing PROPER documentation and evidence, including Social Mapping, REA, Social Innovation, SROI, and other supporting aspects.

Results & Value

The dedicated engineering support helps strengthen the structured implementation of community development and sustainability programs. The collaboration supports stakeholder coordination, PROPER documentation and evidence management, and the implementation of various sustainability initiatives. The presence of a dedicated expert also provides flexible and continuous support based on the program and operational needs of PT Vale Indonesia Tbk. Site Sorowako.
